

Devansh Somvanshi

Balancing the subtleties of design with the brilliance of engineering

Profile

A **Product Designer & Builder**, with **3+ years of engineering experience** shipping web & mobile products to 2M+ users across greentech, workforce & hospitality. I bring technical precision & a product mindset to design teams creating experiences people return to, recommend & businesses grow with.

Design Projects

 **Product Thinking & Design Engineering Bootcamp, Molades**
Jun 2026 – Present

Project 1: RedBus – Return Capture, Role: Solo Product Designer

User Research, Product Thinking, Interaction Design, Prototyping

- A self-initiated concept for RedBus checkout. In my survey **~74%** of round-trip travellers leave the return unbooked, and **26%** later book it on another app. I redesigned checkout so they can **book the return in the same flow, even without a date**, to win back the revenue for RedBus.

Project 2: SideDoor – Job Referral Platform, Role: Solo Product Designer

0→1 Product Design, Product Strategy, AI-first UX, Prototyping

- Conceived and designed SideDoor, a standalone platform that turns referral asks to strangers into a **trusted, two-sided marketplace** for job seekers and employees. Owned the whole product, **from research and strategy to every screen and state** & a coded prototype.

Professional Experience

 **Software Development Engineer–I, Nineleaps**
Feb 2021 – Mar 2024

Project 1: GoodWorker – Learning Vertical, Role: FrontEnd Developer

Micro-frontends, Streaming, Engagement & Monetisation

- Built a learning & media PWA with **HLS streaming**, creator-learner ecosystem, certifications & gamified assessments, for a jobs & upskilling app for blue-collar workers with **1M+ Play Store downloads**.

Project 2: Pure Skies by Devic Earth, Role: FrontEnd Developer

Android & iOS, Real-time Data, Maps & Performance

- Played a key role in building the Android & iOS interfaces for a GreenTech app linked to up to **65% lower PM2.5 & PM10**, with **real-time air quality tracking**, trend analytics & CPCB comparisons on Google Maps.

Project 3: Wibi! Marketplace, Role: FrontEnd Developer & Designer

Design, Prototyping, Flutter & E-commerce

- Designed “Wibi!” (Wish it, buy it!), an intra-org marketplace, **end to end in Figma**, from user flows to prototypes, then **built it in Flutter** for Android & iOS, with Google sign-in, search, real-time chat & sales analytics.

Career Break

- Planned break (Apr 2024 – Dec 2025) for UPSC, then moved to product design via **self-initiated case studies, bootcamp & UX certifications**.

Design Skills

UX Design Design Engineering

Product Thinking Visual Design

Information Architecture

Prototyping Design Systems

User Research Usability Testing

Development Skills

HTML/CSS JavaScript React.js

React Native Flutter Git

Tools

Figma FigJam Cursor Codex

Claude Code Framer Notion

Education

AKTU, Lucknow

B.Tech (CSE) - 2020, 1st Div Hons

Certifications

 **Microsoft UXD Professional Certificate '25**

 **IXDF UXD Certificate '26**

Notable Achievements

Nineleaps

Extra Mile Performer Award '22 & 3× Feather on the Hat '23 for ownership, reliability & consistent delivery quality.

TCS CodeVita

Global Rank 325 in TCS CodeVita '19, a global competitive coding contest.
