

Devansh Somvanshi

Balancing the subtleties of design with the brilliance of engineering

Profile

A Product Designer with **3+ years of engineering experience** building web & mobile products serving over 2 million users. Building across **greentech, workforce enablement & hospitality** drew me toward the thinking behind great digital experiences, leading me from engineering into design. Today, I want to bring an engineer's precision & product mindset to design teams creating experiences people return to & businesses grow with.

Design Projects

 **Product Thinking & Design Engineering Bootcamp, Molecule**
Jun 2026 – Present

Project: RedBus Return Capture, Role: Solo Product Designer
User Research, Product Thinking, Interaction Design, Prototyping

- A self-initiated concept for RedBus checkout. **~74%** of round-trip travellers leave the return unbooked, and **26%** later book it on another app. I redesigned checkout so they can **book the return in the same flow, even without a date**, to win back that revenue for RedBus.

Professional Experience

 **Software Development Engineer-I, Nineleaps**
Feb 2021 – Mar 2024

Project 1: GoodWorker-Learning Vertical, Role: Frontend Developer
Micro-frontends, Streaming, Engagement & Monetisation

- Built a learning & media PWA with **HLS streaming**, creator-learner ecosystem, certifications & gamified assessments, for a jobs & upskilling app for blue-collar workers with **1M+ Play Store downloads**.

Project 2: Pure Skies by Devic Earth, Role: Frontend Developer
Android & iOS, Real-time Data, Maps & Performance

- Played a key role in building the Android & iOS interfaces for a GreenTech app linked to up to **65% lower PM2.5 & PM10**, with **real-time air quality tracking**, trend analytics & CPCB comparisons on Google Maps.

Project 3: Wibi! Marketplace, Role: Frontend Developer & Designer
Design, Prototyping, Flutter & E-commerce

- Designed “Wibi!” (Wish it, buy it!), an intra-org marketplace, **end to end in Figma**, from user flows to prototypes, then **built it in Flutter** for Android & iOS, with Google sign-in, search, real-time chat & sales analytics.

Career Path

Product Design Transition

Apr 2024 – Present

- Took a planned year break for the UPSC Civil Services exam, then moved into product design through **self-initiated case studies, design bootcamp & UX certifications**.

Design Skills

UX Design Design Engineering
Product Thinking Visual Design
Information Architecture
Prototyping Design Systems
User Research Usability Testing

Development Skills

HTML/CSS JavaScript React.js
React Native Flutter Git

Tools

Figma FigJam Cursor Codex
Claude Code Framer Notion

Education

AKTU, Lucknow
B.Tech (CSE) - 2020, 1st Div Hons

Certifications

 **Microsoft UXD Professional Certificate '25**
 **IxDF UXD Certificate '26**

Notable Achievements

Nineleaps
Extra Mile Performer Award '22 & 3× Feather on the Hat '23 for ownership, reliability & consistent delivery quality.

TCS CodeVita
Global Rank 325 in TCS CodeVita '19, a global competitive coding contest.
